Letter no C53-451/43-44 & 2-2-45 from the Dr of P Health stating that the total cost of the Pumping Set as quoted by the firms amounts to about Rs 56,000/- & including erection charges the total cost may come up to Rs60,000/- The Dr of P Health states that the Govt of Mysore has intimated that the 2/3rds of the expenditure to be met by the Govt, half will be paid this year & the other half next year as soon as the Govt budget is sanctioned.

The Dr of P Health also brings to the notice that the proportion of 2/3rds & 1/3 is observed only in the case of annual maintenance charges & that the expenditure in question will be towards the Capital expenditure

2/ Orders are solicited by the Dr of P Health (1) to place the order for the purchase of the pumping outfit thro' the Stores Purchase Committee & (2) to meet the expenditure in question mentioned above

Submitted for orders

Ulla 7/2/45

Please put up the printed copy of Govt no L 4285-87 Rev 84-26-6 dated 4th January 1927 from Govt of Mysore

A copy of the Govt is put up vide flag "S"

Ulla 9/2/45

These papers relate to the question of purchasing a stand by unit to be installed at the Belagola pumping station, Vani vila. waterworks system

2/ The Dir of P-H has reported that the no 3 motor at Belagola was being run on overload for the last 11 years in order to maintain adequate water supply to Mysore city, and that it was not advisable to run it to any longer as it might burnout at any time & thus endanger the whole water supply to the city and that it was necessary to purchase a standbye, thus the works purchase committee The plant was at first estimated to cost Rs 20,000/ Now now estimated to cost Rs 60000/

The President Mysore city municipal council states that the expenditure on question maybe met in the proportion of 1 to 2 in the analogy of general maintenance charges as laid down in G.O. no L4 2885-87 Mul dd 24-11-6 as 4/7 1/9/27 to pay

The whole cost of preparing & two thirds of the above cost or Rs 40000/ in two equal instalments during 4 years from 1926-27

WD 0726—GPB—20 000—1-9-44

The other portion of Mr Wood's charge viz the
1/3rd of the cost is recommended to be met by the
Govt The Director of Works points out that
this amount will have to be found before the
powers made for water supply in
in Jersey in the State Budget for 1945
As this amount will be required to meet
the charges for improvement & extension
Farms, no portion of it can be made
available out of the Loan for Drainage
If so ordered, an additional £3 2000
will have to be paid to the Drainage Fund
for this purpose or the same may be ordered
to be advanced out of the Farms under
the Votel head of 30 years for Public
Improvements, as the entire amount will
is not likely to be spent before 30 6 1945

In regard to the letter dated 4/7 1 1945
of Works it may be pointed out that in para
2 thereof it is stated that [illegible]
the future capital costs of the water supplies
be borne by the Municipal Funds
Reference to that para only refers to 1/3rd of the
annual maintenance charges of the V Waters
is met by the Jersey ratepayers.

It would be therefore in the nature of
a concession to be shewn by the Govt to the
Drainage Fund to give 1/3 of the Capital
Cost of the Island by proposed to be undertaken

The financial condition of the Mfg.
is not satisfactory for Current-year's
full expenditure Hence the request
to the President by one-fifth that
to first may meet one-third of the charges
is for favourable consideration But it
may be said that there is no definite
ruling to the effect that the first should bear
this expenditure The Duty of it by
not also limited with existing interest in
the post, the first have met a portion of the
expenditure on such occasions
However requires immediate orders being
placed for the purchase of the Standbye
Then the Store Purchase committee

2) Points for orders —

1) Whether the purchase of the
Standbye at a cost of Rs 60,000/ may
be approved

2) whether the report of the President,
may not be asked to give a portion of
the cost of Rs 20,000/ on the assurance
be complied with

3) If Rs, The time for meeting the
Duty to be decided

It is however, said that before

having orders, it would be desirable to obtain the opinion of the Chief Electrical Engineer, after examination of the existing machines, if the standbys should be purchased at such a heavy cost immediately to ensure the working of the P.H. of the such capital works were undertaken in respect of these works from the years of renewals upto date & up so, whether the first have contributed any thing that may

From the Director of Public Health & Hygiene
No C C8-32/W S/116-05 of 1 3-45

States that since the transfer of the maintenance of the Vaud Vilas Water Works to the Bureau of Sanitary Engineer in 1932 the Hygiene & municipality has been paying from their funds for all works of a capital nature

38) Subd for advs with refce to paras 29-31 above Where the Chief Electrical Engineer agrees with the Dir of PH that one more pumping set of 350 000 should be purchased immediately, the Director of PH reports that no amount has been granted by the Govt for the works of a capital nature

3/3 39) The facts of this case have been summarised in paras 24 to 29 of the notes supra

40) The Chief Electrical Engineer considers it absolutely necessary to purchase immediately the stand-by oil engine without delay

41) The estimated cost is Rs 60,000 of the work is of a capital nature

The Dir of PH in his report states that the Municipality which has paid in the Municipality fund for such charges that no

portion of the expenditure has been met by the Govt in the past

4 v) According to the reports & opinions available in the file, the installation of the stand by set is an urgent necessity as it is one of the means of ensuring the supply of water to the citizens of Mysore city

43) Having regard to the slender resources of the municipality, it may not be possible for it to bear the heavy cost of Rs 60000 by itself on this plant. It would be a departure from the rule & practice to pay one third of the cost as requested by the President Mysore City Municipality

44) The points for orders are as mentioned in para 29 supra and the orders proposed are in para 31 supra.

Law Secy Govt
5/3/1948

45) The total cost of the pumping set comes to Rs 60,000/- including the erection charges of Rs 4000/-

46) The opinion of the Chief Engineer regarding the duty cost necessarily -

may be sanctioned
47) So far the Govt has not met any share of the capital cost, but having regard to the financial condition of the Municipal Council the Govt may make an exception & pay 1/3 rd of Rs 20,000 as a Special case for 30 bowling sound fountains for public improvements, 2 Swimming pools in towns etc

Cus 6-3-55

Mr. Rao
Mr. Lee

48) As long as the maintenance charges are borne in the proportion of 1 : 2 on the ground that about 1/3rd of the water is used for Govt Palace purposes & this water not paid for the contention of the municipality that all charges capital or revenue ought to be shared in the same proportion appears to be quite correct & sound -

This expenditure of a capital nature is necessary to "maintain" the Water Supply & both parties interested

JE 4618

with the water supply should must be on the charges in the same proportion as the maintenance charge

(51) While on this subject I wish to state that whatever may have been the position some years ago when the ratio of 1 2/1 was fixed for sharing the capital expenditure on mains between Govt & the Municipality this ratio is now unfavourable to Govt

(51) Actually against a consumption of 4.6 to 5.2 million gallons the city was taking when I was there The meters installed to Govt & Pal consuming centres indicated a consumption of only 1 million gallons

52) But even then we must commence to believe that there is a compensation somewhere & Govt is really consuming more & would really have to pay more

I should suggested (when I was President) that the quantity of water taken by Govt & the Municipality may be measured & the cost of maintenance & capital - divided equally on the basis of consumption & would again commend the same as it would be cheaper to us - we can share capital expenditure also on the same basis

53) There is still a considerable amount of capital expenditure to be incurred on the new water supply & the Municipality is going to come up with a request for Govt to meet the expenditure & we have to devise a formula in that behalf

In the alternative we may meet all expenditure up to the delivery point at the filters & charge the Municipality for the water they consume at cost including Capital & Depn

From the Chief Engineer for Govt
No 2141 dt 23-5-45

Requests immediate approval to place orders for the pumping set, towards the S.P.S, as Messrs Walchand and Platt Ltd Bombay have further increased the prices

OFFICE OF THE MINISTER FOR REVENUE & LAW
No 5269
Date 24/5/45

for the Pumping set by Rs 3904/ and they require orders to be placed before the 1st June 1945.

Extract from para 3 of letter No 2147/S dt 24-5-45, from the Chief Engineer Visakhapatnam in regard to immediate improvements to Mysore City Water Supply

1) Installation of a new 350 H P set (Messrs Mather and Platt) at Belagola Rs 68,480

permission has been sought for, in this office no 2065 dt 7-5-45, to place orders at once, pending sanction to the Estimate

2) The Chief Engineer for Visakhapatnam has been urging for the immediate approval of the Government, to place orders through the Secretary S P C for the purchase of a 350 H P pump set for Belagola, as Messrs Mather and Platt Ltd Bombay have further increased the price by Rs 3904 and the firm require the orders to be placed before 1st June 45

3) The question of sharing the costs of Capital works between the Mysore City Municipality and the Government is under correspondence since March, 1944 and a decision in the matter is not yet reached

(23) Kind reference is requested to the Financial Secretary's Note dated 7-3-45 on the subject (vide paras 48 to 53 of the Notes Supra)

In their latest resolution dated 12-4-45,

18/6/45 Engg Secy) Mr 17/6/45

the Mysore city Municipal Council have requested the Government to meet the capital cost of both the schemes (i.e immediate improvements and permanent and long-range improvements) in view of their slender finances and heavy commitments. We will perhaps take some time to consider and pass orders in the light of the several suggestions made by the Financial Secretary to Govt in his note dt 7-3-45, in consultation with the President Mysore City Municipal Council, if need be

(b) In view of the extreme urgency, it is for consideration if the Chief Engineer may not be authorised to place orders for this pump set before 1-6-45, through the Secretary. P.W.D. stated that it would take at least 8 months before the set arrives and the bills become payable.

Refer - para 60 Supra

(c) Pending consideration of the question of sharing the cost which would have to be done while passing orders about the Capital works relating to the improvement of water supply in Mysore city and taken up - provision may perhaps be accorded to the orders being placed through the Secretary, this Purchase Committee for the

purchase of Rs 3500 10-P Pump set for Debt Rs for the supply of water supply

(8) Reference 60 supra

Law dept for 31 Aug

(9) Regarding the sharing of costs suggested the Govt sharing 1/3 the cost as a special case the Dewan Secretary made some suggestions — Reasonable suggestion in para 3 - may be accepted as other boards have will have to be settled in consultation with the Municipality permission may be given for placing indent as recommended by the pumping Engr

Submitted with a Note

paras 70 to 74 Supra

Subj — Apportionment of the cost of Capital works relating to the Vanivilasa water works, Mysore, between the Mysore city Municipality and the Government

— — —

Ref — (1) No PW 339/65 dated 14th March 24 Government sanctioned an Estimate for Rs 4 34 260- for improving the water supply to Mysore ~~State~~ city

(2) As the Mysore city Municipality pleaded its inability to meet the capital cost of the improvements to the Vanivilasa water works Mysore, Government in their order No B 2779-82, dated 30-1-26, directed that the outlay on the Estimate of Rs 4, 34, 260, for the capital improvements of the works be borne entirely from State Funds, that future capital cost of the water supply system be borne by the Municipal Council

(3) Representations were received from the rate-payers in Mysore and also from the Mysore city Municipal Council that the levy of flat rate of Rs 9- per year for each metered connection was too high. It was also stated that proper credit was

not being allowed to the Municipality on account of the proportionate cost of Water Supply to Govt and palace Buildings

(8) In October 1926, Government appointed a Special Committee with Mr M N Krishna Rao as Chairman for consideration of the following questions connected with the Water Supply to Mysore city

1) Determination of the proportionate cost of Water Supply to Government and palace Buildings for which credits may be allowed to the Municipality

2) The most equitable method of improving the resources of the Municipality to meet the maintenance charges of the water works

3) All other questions arising from or incidental to the above

(9) The above Committee was of the opinion that the contribution payable by Government towards the out-lay on the maintenance and operation charges, be fixed in proportion to the quantity of water supplied to Govt and palace Buildings

(10) In G O No L 4285-8-M 84-26, d 7-1-1927, it was ordered, among other things, that

the share of cost of operation and maintenance to be borne by the Municipality and Government be fixed in the proportion of 2 to 1, instead of 3 to 1, as recommended by the Committee

8(2) In connection with the purchase of a steamroller that to be installed at the Belasole pumping station, Kamalasa water works, Mysore, at an estimated cost of Rs 68,480- the president Mysore city Municipal Council has stated that the expenditure in question may be met in the proportion of 1 to 2, on the analogy of operation and maintenance charges

8(3) As the expenditure in question is of a capital nature, both the Director of public Health and the Chief Engineer Irrigation are of opinion that the entire Capital costs have to be borne by the Municipality in accordance with Govt no B 2779-82, dt 30-1-26, which is still in force

8(3) The Financial Secretary to Govt has in his note dated 7-3-45, have suggested the desirability of sharing by Govt the capital expenditure also, as this would be cheaper, and as the existing ratio of 1 2 on maintenance charges has is now unfavourable to

Government

8) If approved, information on the following points will be called for

Consumption of water for the last 4 years by the

1) palace
2) Government Departments
3) Consumption outside Municipal limits
4) Consumption on Special occasions such as Dasara and Birthday
5) Consumption in Public Quarters
6) Road Hydrants
7) Chargeable Institutions
8) The total annual consumption
9) percentage of consumption by the Municipality to the total consumption
10) Details of Capital Expenditure to be incurred on the Vanivilasa water works and their estimated cost
11) Actual Expenditure incurred by the Govt. outside Municipality upto the delivery point at Tellers, and (including Capital and depreciation)

9971. 9) The information referred to above will be called for (vide final steps noted on previous page)

Bangalore

Sir,

In forwarding herewith copies of my letter addressed to the Sanitary Engineer and the Director of Public Health in Mysore, Bangalore, I have the honor to request you kindly to accord early sanction to the estimate for Rs 20,000/- for installing a standbye pumping unit at Belagula Pumping Station, the Government and the Municipality meeting the charges in the proportion of 1 to 2 as usual, being the operation and maintenance charges as per G O No L 8083/M1 84-26-17 dated the 7th July 1928 The Municipality will pay its portion of the cost as soon as sanction of Government is received The Director of Public Health in Mysore has been requested to call for quotations and take further

action in the matter

I have the honour to be,

Sir,

Your most obedient servant,

PRESIDENT

SNR 2

20/11/45

Copy of letter No M5-Mc 367/43 dated 29th November 1943, from the President, City Municipal Council, Mysore, to the Sanitary Engineer, Bureau of Sanitary Engineering, B'lore

---

With reference to your letter No 789 dated 22nd Nov 1943 regarding No 3 Motor of 300 H P at Belagola Pumping Station on overload, I have the honour to state that the Municipal Council at their meeting held on the 27th inst accepted your proposal for the purchase and installation of the standbye unit at a cost of Rs 20,000 at the Belagula Pumping Station in the circumstances explained in your letter They have requested me to request you to see that the installation is taken up immediately to avoid further complications in the supply of drinking water to the city and revised estimates which may be necessitated by delay in taking up the work

In this connection, I am to add that the Government and the Municipality have to meet the cost of operation and maintenance charges of the Vani Vilas Water works in the proportion of 1 to 2, i e , in the present case, the Municipal quota being 2/3 or Rs 13,333 vide G O No L 8023/M1 84-26-17 dated 7th July 1928 The amount will be placed at your disposal on receipt of the formal estimates which may be expedited

The Secretary to Government,
Medical Department, Bangalore

Sir

Re Installation of a standbye unit at Chigale Installation

I have the honour to state that the 3 HP motor at Chigale was being run on overload for the last years in order to maintain adequate water supply to Mysore City. This was against the advice of the Assistant Engineer in charge of the Electrical Section. The Superintendent, Cauvery Power Scheme finally intimated the Sanitary Engineer that it was not advisable to run the motor any longer on overload as it might burn out any time and that either the more water supply to Mysore City as there was no standbye unit

The Sanitary Engineer therefore issued instructions to the Superintendent, Mysore Water Works in October 1951 not to run the motor on overload and simultaneously addressed the President, City Municipal Council, Mysore regarding the necessity for cutting down the water supply and also intimating that quotations for duplicating the 3 HP motor were being called for through the Stores Purchase Committee. The President of the Municipality was later requested to intimate acceptance to place orders, after receipt of quotations, so as to avoid delay. The President has intimated the acceptance of the Municipal Council for the purchase and installation of the standbye unit at a cost of Rs 20,000 But in intimating the acceptance the President has stated that Government

and

and the Municipality have to meet the cost in the proportion of 1 to 2. Copies of this office letter No. C 53-100 dated 13th December 1943 and the No. Mc.367/43 dated 21-12-1943 of the Municipal President are enclosed herewith for the information of Government and orders.

I have the honour to be,
Sir,
Your most obedient servant

—— 'C Barkhamsted

The President, c/o Mr. C. Myles

L4 362/46-46-7 dated 23-9-46

I learn that Govt is already meeting one-third of the gross cost of the annual maintenance charges of Vanivilasa water works Mysore, which includes cost of distribution also

meeting one third of the Annual Maintenance Charges as the Govt has already met the Capital cost upto the delivery point

(24) In the Note dated 5-6-46, the Financial Secretary to Government has disagreed with the Suggestion of the Chief Engineer Pl. C.V. Supra, and has suggested that if these institutions (Govt Buildings and Palace Devt) are to be supplied free, the distribution charges also would have to be borne by the Govt This would mean that the existing arrangement of Govt meeting one-third of the Annual maintenance charges, (which includes cost of distribution also) should continue, free supply being allowed in respect of the Govt Buildings and the palace

(25) A draft reply to the President Mysore City Municipal Council intimating that Govt is already meeting one-third of the Annual Maintenance charges, which includes cost of distribution also

Govt may

May be approved, with immediate commencement

Revenue

9/9

15/9/46

WD 03814—GPB—15 000—20 7 46

Serial No

20) It is seen from the State Budget under 24 Civil works — Sanitary Bureau — that Govt is already meeting one third of the ~~gross~~ gross cost of the Annual maintenance charges of the Vanivilasa water works, Mysore which includes the cost of distribution also

21) Therefore the statement made by the President, in his ~~letter~~ letter dated 8-10-45 that the Govt have not been paying anything towards the distribution System, though water is being distributed to Govt and palace buildings, may not be Correct

22) The further remarks of the Chief Engineer for Sanitation will be invited on the above points

23) Pl revise the above note in accordance with the proposals as finally decided by Cabinet

23) The proposals of the Chief Engineer for Sanitation are as follows —

a) All the maintenance works from the Source to delivery point at Filters, and Distribution, to be done out of municipal Funds

b) that Govt Buildings and Palace be exempted from payment of water Charges, as the Government have already met a major portion of the capital cost of the Vani-vilasa water works

c) that the Govt be exempted from

Returned, with compliments

11 2) A copy of the note furnished by the Executive Engineer, Water Supply Division on the subject is placed below It is seen therefrom that mostly the capital expenditure on the Vani Vilas Water Works is from Government funds As the City expands, it may be possible to develop the existing plant in the near future to meet the additional demand for water When the Capital cost up to the delivery point at the filters is met by Goverrment, there is no reason why any charges, in the shape of contribution towards the maintenance of the plant, for water consumed in the Palace and Government institutions, should be paid

11 3) I am therefore, of the opinion that, the cost of maintenance of the entire plant (Head Works, Machinery, Mains, reservoirs etc, plus the depreciation thereon, improvements to and maintenance of the distribution system within the Mysore City area be met by the Municipality, the water consumed at the Palace and Government institutions being free, in view of the large investment by the Government on the Capital Works up to Mysore

No 3 ump No 25547-9/11-2 ST edivane & P Ltd at elagola

I have the honour to report that the question of o 3 otor being over loaded was referred to the akers essrs ather & Platt Ltd B mbay and they advised that the diameter of the impellers be re uced by 14 mm To reduce the load on the motor the reduced impellers were fitte in the beginning of ovember 1943 and the end thrust ball bearing was observed to slightly warm up The bearing worked for about 3½ months with slight water cooling and was found to suddenly develop a cracking noise On examination a few balls were found broken This bearing as remove an another bearing which was available was fitted up and the pump started The same trouble was experienced and again the balls were found cracked

It is to be observed in this connection that both the motor and the pump are looked allowing no play for any alterations in the hydraulic balancing forces and from the characteristics of the pump it is seen that reduction of the load on pump from 400 with the larger diam impellers to 365 with the reduced diam impellers appreciably increases the discharge It is likely that due to this effect the p rformance inside the pump may not be perfectly continuous and might result in an intermittent hydraulic balance effect which might seriously affect the ball bearing due to intermittent and sudden load of the unbalanced hydraulic effect coming on it It is essential that the firm's engineer be called in at once to advise us regarding the satisfactory performance of this pump and also as to how we can preserve the life of the ball bearings which are hard to secure An immediate and urgent reference may be made to essrs ather & Platt Bombay to send their engineer immediately

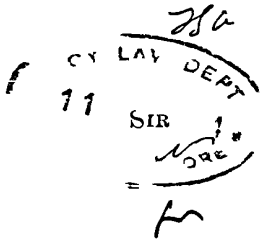
Law Department, Bangalore



Installation of a standbye pumping unit at the Belagola Pumping Station

With reference to your letter No L 10832/M1 dated 24th April 1944 enquiring if any quotations have been called for, for the unit, I have the honour to state that the quotations received from the Secretary, Stores Purchase Committee, were forwarded to the General Superintendent, Cauvery Power Scheme by the Sanitary Engineer on 8-4-1944 for remarks on the electrical side of the equipment In his letter No 21035 dated 11-4-1944 addressed to the Sanitary Engineer, the General Superintendent has opined that the motor should be suitable for dual frequency, viz , should be suitable for operation initially at 25 cycles and finally at 50 cycles due to the programme of converting the entire state electrical supply from 25 to 50 cycles soon after the cessation of hostilities The General Superintendent has therefore suggested for referring the matter back to the firms who have quoted for the equipment to quote for a motor which is suitable for dual frequency and of 350 H P capacity A copy of the letter is enclosed for the information of Government On receipt of specifications from the General Superintendent, the Secretary, Stores Purchase Committee, will be addressed to call for fresh quotations

I have the honour to be,
Sir,
Your most obedient servant

Director of Public Health

bnn

Letter No 21035 dated 11-4-1944 from the General Superintendent, Cauvery Power Scheme, Bangalore, to the Sanitary Engineer, Bangalore

---

With reference to your letter No 5519 dated the 8th instant, forwarding quotations received against enquiry No 6328 for the Pumping Set required for the Vani Vilas Water Works, Mysore, I have the honour to inform you that the specification of the capacity of the pump indicates that 1650 gallons per minute is to be pumped against a total head of 405 ft from all causes This requires at an over all efficiency of 66-2/3%, a 305 H P motor In order to have some extra capacity in the motor for securing extra discharge when the total head at which it is to be pumped is less than 405 ft , it is desirable to specify 350 H P

Further, Government have already notified that large size motors proposed to be installed in the State should be of dual frequency, viz , should be suitable for operation initially at 25 cycles and finally at 50 cycles due to the programme of converting the entire State electrical supply from 25 to 50 cycles soon after the cessation of the hostilities Therefore it is very necessary now to arrange to refer the matter back to the firms who have quoted for the equipment to quote for a motor, which is suitable for dual frequency and of 350 H P capacity

If you desire, necessary specification therefore will be prepared and forwarded to you for reference to the firms through the Secretary, Stores Purchase Committee

As the electrical equipment now offered is not suitable, the tenders received are herewith returned

BANGALORE

Sir,

Re Installation of a standbye pumping unit at Belagola Pumping Station

---

In continuation of this office letter No C53-433 dated 11-1-1945 on the above subject, I have the honour to state that the total cost of the pumping set as quoted by the firms amounts to about Rs 56,000 and including erection charges the total cost may come to about Rs 60,000

The President, Municipal Council, Mysore, who was addressed by the Sanitary Engineer, Bureau of Sanitary Engineering, Bangalore, on 12-1-1945 in the matter of placing funds at his disposal so that further action may be taken, has replied in his letter of 19-1-1945 intimating that out of the 2/3 rds cost to be met by the Municipality, half will be paid this year and the other half will be paid next year as soon as sanction of Government is received for the estimate and that the work may be proceeded with

The Sanitary Engineer, Bureau of Sanitary Engineering, Bangalore, in sending a copy of the above letter of the Municipal President, states in his letter No 779 dated 30-1-1945 that in every letter that is being received from the President he has been mentioning that 1/3 cost on this and similar other estimates should be borne by the Government and that the budget sanction for the Department does not contain any provision for the accommodation of such debits He further states that the only way to get the funds is by a grant to be sanctioned by Government on requisition by the President, City Municipal Council, Mysore, and to be drawn by him just as in the case of other Municipalities A copy of Sanitary Engineer s letter is enclosed

P TO

The Government contribution will have to be made available from 30 Grants for Public Improvements, 2 Improvement of Water Supply in Towns in the budget as already intimated in this office letter No C 53-229 dated 18-4-1944

As per present Government Order it is only in the case of annual maintenance charges, the expenditure is to be met in the proportion 1/3 and 2/3 by Government and by Municipality respectivel But this expenditure for the purchase of a pumping outfit will be towards the capital expenditure I request immediate orders of Government whether orders may be placed with the firm through Stores Purchase Committee, Bangalore

I have the honour to be,
Sir,
Your most obedient servant,

B G Barkhanis

Re Purchase of a standbye unit for the Belagola Pumping Station

---

I have the honour to enclose herewith copy of letter No M 4 43/43-44 dated 19-1-1945 received from the President, City Municipal Council Mysore, in reply to this office letter No 1097 dated 12-1-1945, copy of which was submitted in this office No 726 dated 12-1-1945, and to reque you to kindly inform me if I may place orders with the Stores Purchase Committee for the required machinery in anticipation of sanction to the revised estimate to be submitted and the receipt of funds In this connection, I have to point out that in every letter that is being received from the President, City Municipal Council, Mysore, he has been mentioning that 1/3 cost on this and similar other estimates should be borne by Government The budgets sanctioned for this Depart ment do not contain any provision for the accommodation of such debit. The only way to get these funds is by a grant to be sanctioned by Government on requisition by the President, and to be drawn by him ju as in the case of other Municipalities, and making it available for expenditure by this Department It does not seem right for the Munici Council to waive the responsibility on this account This point will have to be clearly taken to his notice so that at least in future the recovery of contribution from Government may be the concern of the Municipal Council, this Department being required to carry out works f funds made available

Urgent orders regarding the purchase of the machinery may kindly be accorded

Encls

OFFICE OF
Chief Electrical Engineer
to the Govt of Mysore

Bangalore,
Date 20th February 1945

To
The Secretary to the Govt of Mysore,
Law Department,
BANGALORE

Sir

With reference to your letter No L-7996 dated the 12th instant, I have the honour to state as follows -

At present there are three pumping units in service at Belagola Pumping Station supplying water to the City of Mysore One is of 300 H P and 2 of 240 H P each In order to meet even to a limited extent the demand of water from the city of Mysore, one pump of 300 H P and one of 240 H P have to be run all the 24 hours of the day While one of the two 240 H P pumping sets are worked alternatively, the 300 H P pumping set has to be run continuously without respite with the result that even minor attention is not being paid to this pumping set and therefore it cannot be expected to serve long at this rate If a breakdown of this unit were to occur, the city of Mysore would be in a terrible tate for want of sufficient quantity of water Therefore the Sanitary Department have proposed the installation of a 350 H P pumping set, so that the four pumping sets may be worked, two at a time continuously, to meet the demand This will give facility for overhauling any of the pumping sets periodically and ke p them in a satisfactory working condition In case of breakdowns, there will be always enough pumping capacity to meet the demand of the Mysore City

Therefore I agree with the Director of Public Health that if the demand of Mysore City for water supply is to be met at least to the extent that is being met at present, one more pumping set of 350 H P should be purchased immediately and installed

I have the honour to be,
Sir,

LAW TO GT
GT OF MYSORE

The Secretary to Government,

Law Department

Sir

Regarding the purchase of a 350 H P Pumpset for Belagola for Mysore City Water Supply

I have the honour to invite your kind reference to correspondence ending with letter No C 1832/WS 44-45 of 28-2-45 from the Director of Public Health to you on the above subject and to submit a report as follows for obtaining immediate orders

This subject of the purchase and installation of a 4th Pumpset at Belagola is under correspondence for over two years in regard to the sharing of the expenditure on this Capital work between the Government and the Mysore City Municipality According to the G O B 2779-82 of 30-1-26 which is still in force in regard to Capital works in Mysore City Water Supply the entire capital costs have to be borne by the Municipality

The situation at present is that both the Municipal Council as well as the Committee appointed for considering the immediate improvements of Mysore City Water Supply have resolved that this Pumpset should be arranged to be got installed at the earliest

Quotations have been obtained by Stores Purchase Committee for the set during August to October 1944 The Chief Electrical Engineer has scrutinised them In his No 15190 of 3-1-45 he has recommended the purchase of the M & P Plurovane Pump coupled with a 350 H P M & P Motor and the connected appliances amounting to Rs 50 046/- as per these details noted below This quotation happens to be the cheapest also The estimate for its purchase and installation with all the necessary pipes and valves and connections to Rising Mains amounting to Rs 64 570/- is also receiv-

received from the Executive Engineer, Water Supply Division, and under submission to Government

Even if orders are placed immediately by the S P C with Messrs Mather & Platt it will take at least 8 months more before the set arrives and the bills become payable. By that time this questic of sharing the capital costs of the works for improvement of Water Supply will have been decided

Under the above circumstances favour of immediate orders is requested to place orders through the Secretary Stores Purchase Committee, for this Pump set

Details -

1	~~Phoro~~ Pluvo Vane 8" x 10" Pumpset with 350 H P motor	Rs 33762
2	Auto Transformer starter	11531
3	Spare starter coils	2852
4	~~Spares for pumps~~ Pump spares	1720
5	Spares for Starter	181
	Totals ~~costs~~	Rs 50046

350 H P Motor Pumping set for Belagola
Your Enquiry Ref 6560 dated 1-6-1944

In reply to your letter No 3346 dated the 4th May 1945 the present day prices are as follows -

Prices as quoted in our estimate 2437 dated 25th July 1944	Present day prices as on 11th May 1945	Excess
Rs	Rs	Rs
30 145/-	32 140/-	1 995/-
10 520/-	11 040/-	520/-
11 350/-	11 920/-	570/-
1 720/-	1 842/-	122/-
2 620/-	2 803/-	183/-
181/-	191/-	10/-

Prices as given in our Supplementary estimate No 2437 dated 28-10-1944	Present day prices as on 11th May 1945	
1 255/-	1 325/-	70/-
2 362/-	2 535/-	173/-
372/-	390/-	18/-
181/-	191/-	10/-
232/-	257/-	25/-
2 852/-	3,060/-	208/-
		Rs 3,904/-

Would you please substitute the prices in the right hand column for those given in the estimates mentioned

We would further add that to this price includes increase in the cost of manufacture etc that have taken place since the dates of the tenders mentioned

Furthermore they are now based on the following -

Freight at 130 Sh per ocean ton
Marine Risk at 1 6%
War Risk at 4 125% on the C I F value
Duty at 10% on the C I F value excluding War Risk
Railway freight at current rate from Bombay or Madras to Mysore

We trust that this information will enable you to place order with us

As the value of this order will be greater than Rs 25 000/- F O R U K Port, you will have to register the same under the "Capital Goods Registration Scheme"

<u>This must be done before the 1st June 1945 If, therefore, you propose to place this order it must be done immediately</u>

Proceedings of the Government of His Highness the Maharaja of Mysore

Read—1 o do No L 12442-8/Ml 67-44-4, dated 22-6-45, according sanction for the purchase, thro' the Secretary S P C of a Pluvo Vane Pumping Set of 350 H P, at a total cost of Rs 53,950- for installation at Belagola for the Mysore Water Supply

Order thereon—No 2) Letters No 389/45 dated 27-8-45 & 467, dt 5-9-45, from the Chief Engr for Irrigation, requesting approval of Govt to the action taken by him, in the circumstances stated therein, in placing orders thro' the Secretary, S P C for the Supply

of a 350 H p Maker and
plant, 9" x 11" Two stage Mod vane
latest type pumping set with
350 H p motor, by Air Mail
from London to Karachi, and
from there to Mysore by the
passenger train, in view of
the urgency

order no L-2205-10 19/9/41

The Chief Engineer for
Irrigation reports that it was subsequently found out that the
pitot-vane pumping set could not
give more than 2 4 million Gallons
per day, while there is need to have
a pumping set of 3 Million Gallons
a day against 380' to 400' head,
coupled with a 350 H p Motor
He has therefore requested the
Secretary to P C, to place orders
for a 350 H p Maker and plant
9"x 11" Two stage Mod vane latest-
type pumping set with 350 H p
Motor, which has accordingly
been done The total cost of the

List of Enclosures

Copied by

Examined by

Set, as finally worked by the Firm to be Rs 5-4087/70 R Mysore The resultant excess over the sanctioned amount is Rs 137 only We has therefore requested approval to the modifications referred to above

It is also stated that one of the pumps at Belagola gave way for want of the impellers, and thus rendering the position of water supply in view of the urgency in Mysore very precarious, and that arrangements have been made to obtain by Air Mail, from London to Karachi and from there to Mysore, by passenger train, the above impellers

The above proposals of the Chief Engineer are approved

Office of the President
City Municipal Council Mysore
Dated 8th October 1946

Mi 46-46-6

From

R Ramachandra Rao Bhombore Esq B A
President City Municipal Council
MYSORE

ADDITIONAL SECRETARY TO GOVERNMENT
No
Dte 14/46

To

J B Mallaradhya, Esq , M A ,
Additional Secretary to Government,
Bangalore

Sir,

In continuation of this office letter No M4 52/45-46 dated the 19th August 1945 regarding the particulars required in connection with the installation of a stand bye unit at Belagola Pumping Station I have the honour to note below the particulars required, as furnished by the Executive Engineer, Water Supply Division -

A Consumption of water in the City for the last 4 years -

1941-42	1600128000 gallons	
1942-43	1593123000 gallons	
1943-44	1555913000 gallons	
1944-45	1519083000 gallons i e ,	4 16 million gallons daily

B I the Palace 9350230 gallons per month on an average or 31 M G
2 Several Govt Departments 10329140 gallons per month on an averagd or 344 MGD

3 Consumption outside Municipal Limits

a	Railway workshop	1200000 gallons per month	
b	Coorg Coffee works	111000 gallons "	
c	Dalvoy Gardens	26000 gallons "	
	Total	1336000 gallons i e ,	0445 M G D on an average

4 Consdmption on special occasions such as the Birthday and Dasara Sessions

1944-45 4 2 million gallons extra consumtpion in about 12 days or 35 M G D extra going up to 5 M G D also sometimes

5 Consumption in Military quarters

a	III Infantry Lines	760590 gallons per month
b	Mysore Horse	297800 "
c	H H M O I Lines	Not gauged

This consumption is included under Item 2 above

6 Road hydrants 225 installed and 73 working not gauged
7 Charitable institutions 36 in number Not gauged
8 Total annual consumption 1519083000 gallons in 44-45

9 Percentage of consumption by the Municipality to the total consumption It is not possible to compute this percentage correctly since there are no meters to several buildings and since the quantity of water supplied to certain quarters such as Lalitha Mahala, Chamurdi Hills etc , is not known Besides it is not known if the Water Supply Department has gauged the supply of water to the buildings mentioned in the enclosed statement However according to the figures furnished, barring supply of water to the buildings specified in this para the percentage works out to 83 2% as follows -

PTO

i Total consumption is 4 16 M G D
ii Consumption under items 1,2 and 3 above 6985 M G D
iii Balance of consumption for other purposes and public use is 4 16 minus 6985 m e , 3 4615 M G D

iv Percentage is 3 4615/ 4 16 x 100 i e , 83 2%

In this connection I wish to point out that the Government have not been paying anything towards the distribution system though water is being distributed to Government and Palace Buildings and places outside the City limits through the distribution system It seems to be justifiable for the Government to bear 1/3 expenditure on the distribution system also, as in the case of Belagola Pumping station and Jewell Filters, for which the Municipal Council have been urging often

10 (a) Details of capital expenditure to be incurred on the Vanivilas ater Works For the present an estimate for o 6 lakhs is prepared for immediate improvements out of which 1 24 lakhs go for zone tanks and 3 lakhs for meters

(b) Capital cost of V V ater orks Plant The figures are under verification Subject to vertification by the Comptroller, the approximate capital cost to end of 1938-39 is 26 38 lakhs Additions made since 1938-39 are two pumps at Belagola and 2 at Combined Jewell Filters with spares etc and extension of buildings near Filters Crane for filters pit (sanctioned estimate is for Rs 19,000) the cost incurred being Rs 17,000 The approximate total capital cost thus is Rs 26 55 lakhs

11 Actual expenditure incurred by the Government up to the delivery point at Filters (including capital and depreciation charges)

The outlay during 1944-45 was Rs 2,26,324 and the Municipal share of expenditure being 2/3rds of the total expenditure plus 2½% on account of audit and direction charges and 5% of sanitary Engineer's establishment, was Rs 1,56,062 The estimate for 1945-46 is Rs 289,000 excluding 5% of Sanitary Engineer's establishment charges amounting to Rs 1,334 and 2½% of audit and direction charges amounting to Rs 4,817 The municipal share of the estimate works out to Rs 1,98,818 against Rs 1,56,061 in 1944-45

I have the honour to be,
Sir,
Your most obedient servant,

PRESIDENT

Statement B

Mysore City Municipality

Statement of gardens (Palace and Government) which have not been paying any water revenue to the Municipality

Sl No	Name of Garden	Remarks
1	Race Course	The approximate consumption of water will work out from 90,000 to 1,00,000 gallons per day
2	Nishat Bagh	
3	Tennis court and Garden to the South of Government House	
4	Zoo garden	
5	Dally Avenue	
6	The Hedges etc , along Boulevard road	
7	Lalithadri Hill gardens	
8	Chamundi Hill gardens	
9	Park near Palace Maramath Stores	
10	Flag Staff gardens	
11	Nursery adjacent to Palace west gate	
12	Elgin fountain garden	
13	Lawn along Sayyaji Rao Road	
14	Palace Nursery (two items)

Statement C
Mysore City Municipality

List of some Government and Palace buildings with very extensive gardens in respect of which no revenue is being paid to the Municipality for the supply of water for non-domestic purposes

Sl No	Name of building	Monthly average consumption (domestic and non-domestic)	Quantity of water used for gardening only	Remarks
		a m l a s b		
1	Government House gardens	3,66,800	1,83,400	For purpose of determining the consumption of water by the gardens alone out of the total consumption for domestic as well as gardening purposes, only half the total consumption is reckoned as being the consumption by the garden, though in fact it should be 2/3rds
2	Vasanthamahal gardens	1,79,237	89,618½	
3	Chamundi Vihar gardens	55,033	27,516½	
4	Aswath ₿ Villa Garden	48,105	24,052½	
5	Kismeth Garden	47,868	23,934	
6	Rukmalaya	30,668	15,334	
7	Garden attached to Vice-Chancellor's Quarters	26,646	13,323	
8	do Professors' Quarters	20,196	10,098	
9	do do do	20,071	10,035½	
10	do do do	16,581	8,290½	
11	do do do	11,853	5,926½	
12	do do do	10,787	5,393½	
13	do White House	21,820	10,910	
14	Mount View Garden	15,209	7,604½	
15	Bloom Field do	17,427	8,713½	
			4,44,150½	

Several other buildings with very extensive gardens such as Alanahally Bungalow, Lalithamahal, Lake view, High View etc , have been omitted for want of actual readings, not to say anything of the numerous other buildings with gardens such as the Warden's Quarters etc , etc

PRESIDENT

4,44,150 gallons per month or 14,805 gallons per day

N o t e

From the File furnished and the records so far made available to this office by the Sanitary Engineer it is difficult to give an authorised note The capital and Revenue accounts of the period from 1926 -27 upto 40-41 have been studied They are by no means sufficiently illuminating The Office records also do not give any definite clue Subject therefore to verification, the following facts are put forward showing the methods so far adopted in financing the Vani Vilas Water ~~&~~ Works System

The Government Order L 6058-65/41 176-19-25 of 19-4-22 applied to both Mysore and Bangalore Municipalities that the entire capital costs of improvements should be financed by the Municipalities In so far as the improvements of Distribution system within Municipal Limits is concerned this is being done in Bangalore, the works outside being met by Government In Mysore the Municipality pleaded inability Yet finally in Government Order B 2779-82 dated 30-1-26, Government ordered all future capital costs being met by the Municipality though at that time the Government bore the cost of Rs 4,39,320/- for 'Improvements of Mysore Water Supply' entirely This order has not yet been annulled In letter No C 18-32/45-5 of 1-3-45 of the Director of Public Health to Local Self Government Secretary, it is stated that it is ascertained that ever since 1932 since the Vani Vilas Water Works went to the Bureau, no instances are traced in which Government have shared the Expenditure in respect of a capital nature It is however clear that up to 1926-27 the entire Vani Vilas Water Works System including the Distribution system was financed by Government just as up to 1922 or so it was done in Bangalore City

From a study of the Capital and Revenue Accounts from 26-27 to 1940-41 the following facts are elicited -

Cost of entire plant financed by Government to 1925-26 end = Rs 17,47,855/- including Distribution System in Mysore

The works of 'Improvements to Mysore Water Supply" are shown as the only works being done and sums of Rs 1,19,284/-, 3,33,423/-, 66,931/- and 53,494/- are added to Capital upto 1920-30

Capital costs at end of 29-30 = Rs 23,90,458/-

It is therefore probable that up to this period the Government have financed the entire Capital Costs of the plant inspite of the Government Order B 2779-82 of 30-1-26

The further Capital and Revenue Accounts up to 1935-36 show the additions of works amounting to Rs 2,43,909/- There are some small works listed in these accounts like Sub-Mains in Vani Vilas Mohalla, 3" in Kannegowdan Koppal, 3' in Balaraj Urs Layam, Water Supply sub-mains in Chamundi Extension and so on, and also a $3\frac{1}{2}$ Million Gallon Pump at Belagola, Pumps and Filters at Mysore Water Supply to Railway Workshop, and so on It is not clear whether these works both outside - Mysore and inside City Distribution are financed by the - Municipality or by Government alone In the 35-36 Capital and Revenue Accounts mention is made of Government Grants under 30 (b) Miscellaneous Public Improvements from which certain works are effected in Mysore inspite of the Government Order of 30-1-1926

It is also seen that a scheme for 3 3 lakhs to be worked in these stages was sanctioned for "Urgent Improvements

in Mysore Water Supply" under Government Order L 112-1)/M1,246 31-14 of 8-7-1933, and in the first stage of 1 51 lakhs the Government quota ~~Capitalxand~~ was Rs 50,000/- and the loan was 1 1 lakh It is reported in the Capital and Revenue Accounts of 36-37 that this loan has been paid back by the Municipality

Again from 36-37 upto 40-41 the printed Capital and Revenue Accounts state no capital works are added The Capital outlay at end of 35-36 (direct and indirect) stood at Rs 26,37,915/- It may thus perhaps be said that the differences between 26,37,915/- and 23,90,458/- = 2,47,457/- represents a mixture of finance both Government and Municipal and both in Head works and in the Distribution

There are also a number of works sanctioned in Government Order's L 6969-71/M L 198-35-4 of 12-3-36, G O L 85 8575-78/M1 129-36-2 of 1-6-37, G O L 3761-65/M1 48-38-4 of 9-11-38, G O L 1421-24/M1 36-110 of 6-8-37, G O 5144-46/M1 47 40-1 of 8-1-41, G O L 10754-6 M1 42-15 of 4-5-43, amounting to nearly Rs 1,31,000/- chiefly of Trunk Mains, and Distribution system and purchase of meters though here too a few works refer to Belogola and Filters These are not brought into the Capital and Revenue Accounts since 1936-37 All these appear to be purely financed by the Municipality The latest big works are the Lakshmipuram Tanks 12,500Ø, the Vani Vilas Mhohalla Works 29,610/-, etc , which are also financed by the Municipality entirely

It may generally therefore be concluded that in the total Capital outlay as at end of 35-36 of Rs 26,37,391/- not more than about 2½ lakhs is the Municipal Contribution The present total Capital outlay is about 29 lakhs or 2½ lakhs more are paid by the Municipality

In all therefore, the Municipality may not have paid more than about 5 lakhs out of 29 lakhs in the Water Plant of Mysore, while in Bangalore the Municipality has not paid for any part of the Head Works, there is no clear demarkation in Mysore the Municipality having paid at the Head Works and Filters also

This appears as though the financing of the Capital costs is in the inverse or the reciprocal ratio to the quantity of water consumed every year respectively by the Government and the Municipality, vide the 83 2/ and 17 8% referrred to in letter No M 452/45-46 dated 8-10-1945 of the Municipal President to the Additional Secretary to Government

In regard to the future policy for the financing of capital costs both for Head Works and Plant and for Distribution system as well as of Annual Maintenance, etc ,

The Government Order No 2779--82 of 30-1-26, needs to be modified since the restriction placed therein, has produced the present unsatisfactory and under developed condition of its water supply in this premier city, the residence of our sovereign The Municipality has been finding it too costly to develop the Head Works and Plant, and the Government have been even after 1926 been often meeting such expenditure though in part

The suggestion given in para 53 of Financial Secretary note requires consideration with the modifications submitted herewith

The entire costs of developing the Head Works and plant including Mains

plant including Mains, service Reservoirs, etc , up to Lysore may be financed by Government In return the Municipality may pay the entire Annual Maintenance charges, plus the annual depreciation on the plant up to the above point All the Government and Palaces etc , connections may be gauged, and the percentage of consumption and the percentage of consumption in Government, Palace, and similar Institutions, fixed up as the percentage of the Annual Maintenance cost to be contributed by Government This percentage may be revised once in five years by another gauging or alternatively all such services may be metered by the Municipality and once in every year the provision on such a basis provided for in the A M Estimate as the portion to be paid by Government

As regards the City Distribution System, it may be made over to the Municipality evaluating it for the portion laid at Government cost up to 1926-27 or 1929-30 All works of development inside in the Distribution system may be entirely financed by the Municipality No extra charge shall be leviable for the water supplied through this system to the Government and palace and other similar Institutions since this water will be paid for by Government as referred to supra

The advantages of this proposal are -

1 The water supply plant can be developed according to grown and needs with out any procrastination

2 The sentiment of the gift of Vani Vilas Water Works will be respected, and every citizen as well as floating, population will be given adequate supply of wholesome water

3 The Municipality with its too slender resources will be substantially assisted

4 The Government and Palace, etc , also will pay on metered basis for the water they consume There will be no suspicion or camouflage, etc , any where In all probability the annual costs will be less than in the present ratio of 2 to 1

The only defect in this proposal is:-

The Municipality may not finance the expenses for improvements to internal Distribution system in time and to the the extent realy required Ir view of the huge concessions proposed regarding the Head Works and their developments waiving all interest charges, and levying only depreciation charges, the Municipality ought to be able to look after at least this portion of their Distribution System Some kind of a special mention in Government Order must be made that the Municipality shall finance such costs of developments of Distribution system within one year of its presentation by the Public Works Department In the event of their failing to do so, Government should get them executed and recover costs as a liability

Subj: Improvement of the Capital and Revenue expenditure of the Vanivilasa water works, Mysore

Sir,

With reference to the correspondence ending with your letter no M 452/45-46, dated 8-10-45, stating that the Govt have not been paying any thing towards the distribution System though water is being distributed to the Govt and the palace buildings and requesting the Government to meet one third of the expenditure on the distribution System also, I am directed to state that the Government is already meeting one third of the gross cost of the annual maintenance charges of the Vanivilasa water

works, Mysore, which includes the cost of distribution also

Yours sincerely

[illegible] Revenue Secretary.
